

Rock Talk

April 08

Can you believe it here we are coming into April and the first field Trip of the year!  
Finally a reason to get my clothes dirty other than shoveling snow. Look out all you little  
Bacculites here we come.

For fun here is a snapshot from the March meeting--

It is Saturday and I have not yet gotten in touch with the Blm re the threatened fees for  
groups but will update this as soon as I find out.

Just got a call From Cannon City club sand the new hope site will be cleaned ( the trench  
will be made better ) and possibly a frame will be in place or at least under construction  
for a bucket lift to lower you down into the mine and really see the Amethyst veins.

More later Dick 3-15-08
